Ladings are designated "Straight" and "Order Specify."</p>

BUNCHING – The accumulation and tender of railcars for loading or unloading, in excess of orders, shipped on different days contrary to customer’s schedule. Since Tacoma Rail does not control the flow of inbound cars from connecting railroads, no allowance can be made in demurrage charges for bunching.

CARE-OF-PARTY – The party to whom railcar placement is to be made pursuant to the bill of lading, if other than the consignee at destination. When the bill of lading indicates a Care-of-Party, said party will be responsible for all demurrage, storage, and hazardous storage charges.

CONSIGNEE – The party designated on the bill of lading as the entity entitled to receive delivery of the goods/shipment from the carrier. The consignee may also be the unloader, care-of-party, warehouseman or transloader.

CONSIGNOR or SHIPPER – The party designated on the bill of lading as the entity which has caused the goods to be shipped or who furnishes forwarding directions. The consignor may also be the loader/unloader, warehouseman, or transloader.

CONSTRUCTIVE PLACEMENT (PCON) – When a railcar(s) cannot be actually placed due to any of the following conditions:

3. Customer has not requested railcar when designated as an “Order-In” customer
4. Customer track is not accessible, for example:
 - Blue or Red flag placed by customer or third party
 - Track blockage to a customer by a joint track user or 2nd customer on the same track
 - Customer’s siding/spur is locked by customer or joint user
 - Customer’s facility track is inaccessible due to safety issues or improper track condition
 - Railcar is not suitable for movement: hoses attached to railcars, hatches open, etc.

CUSTOMER (PATRON) – The shipper, consignor, loader, consignee, unloader, care-of-party, or other party who resides within Tacoma Rail’s service territory and controls the disposition of a railcar. The customer is responsible for the payment of demurrage, detention, storage, or other charges specified in this tariff.

CREDIT – A unit of value assigned to a railcar for the relief of a demurrage day. Credits are utilized to offset accrued debits.

DEBIT – See demurrage day definition below.

DEMURRAGE – Demurrage is a charge for detaining a railcar. Railroads charge demurrage as an incentive for customers to load and unload railcars promptly, to prevent congestion in railroad terminals caused by idle railcars, and ultimately to improve the utilization of a valuable asset.
